PROJECTS

Student Attendance Management System — Mar 2024 - June 2024

- We developed a system to track and manage student attendance efficiently, where the teacher and students can get the real time updates with integrated dashboard for attendance analytics, generating daily/weekly/monthly reports. Used Bootstrap4 Framework with HTML, CSS, and JavaScript for frontend PHP as backend language and MySQL for manipulation of Database.

NEP's Academic Assistance — June 2023 - Sep 2023

- Developed a robust web application using PHP and MySQL database.
- From our project students can get (UUCMS- Unified University College Management System website) NEP's updates, their corresponding notes with question papers and also assistance videos related to academic. Used HTML, CSS, and JavaScript for frontend PHP as backend language and MySQL for manipulation of Database.

INTERNSHIP
